

## BROWARD GAS STATIONS PRE-WIRED FOR GENERATOR POWER

A law requiring certain gas stations to be pre-wired for backup generators took effect at the beginning of the 2007 hurricane season. In Broward County, all large gas stations with at least 16 fueling positions (eight dispensers accessed from both sides) located within a half-mile of an interstate, turnpike or evacuation route must install a pre-wired system which will allow the station to switch to emergency generator power during disasters to run pumps, cash registers and other critical equipment. The station is not required to have a permanent generator on-site; they can be pre-wired and rent a generator. The law does not require the station to be open for business after a natural disaster. (All stations listed below have completed or are in the process of pre-wiring their stations for generator power.)
